Public Notice of Intent to Award a Sole Source Contract for Web-Based Transit Planning Software

Date: March 7, 2022

Item: Transit Planning Software

Vendor: Remix

The Duluth Transit Authority plans to finalize and execute a sole source contract with Remix Software, Inc. to provide web-based transit planning software. The software is an online web browser-based public transportation planning platform that facilitates collaborative transit planning.

This product will provide the DTA with the following required elements to be used in the transit planning process:

- Drag and drop plus route sketching functionality
- Integration with census data
- Route costing
- Cloud-based application

The DTA is not looking for a scheduling or route optimization tool. The need is purely for planning software that can easily produce scenarios that look at demographic and cost data on a web-based platform.

Any vendor, organization, or person having the capability to provide the software and maintenance and support services as Remix Software, Inc. provides or has information that may refute the determination that the goods or services being procured are NOT a sole source shall send an email to DTA to nbrown@duluthtransit.com, no later than 5:00 pm CST on March 15, 2022.
