Section 6 TECHNICAL SPECIFICATIONS FOR Text Messaging Services

A. Background

The Duluth Transit Authority (“DTA”) would like to implement a real time “where is my bus” text messaging feature to connect transit customers with accurate, highly reliable real time arrival predictions for the next buses arriving to that particular stop. The goal of this project is to offer customers a simple messaging system to advise the customer on the predicted arrival time for the next three buses at the customer’s stop.

The text messaging project is scheduled to be implemented before a planned upgrade to the DTA transit system in second quarter of 2023. The DTA has assigned an ID number at every stop and intends to provide real time information via the MYDTA mobile app and would like to offer the option of a text message for those who don’t or can’t use the MN DTA app.

Presently the DTA offers 6,000 trips per day. A trip planner is offered on the DTA website, www.duluthtransit.com, and is available on the Transit App as well. The DTA also offers an open API, other trip planning apps also link to the DTA, but they are not tracked by the DTA.

The DTA is open to proposals that have prediction algorithms that may be more accurate than the DTA’s current product. The Proposal should include all costs associated with the predictive algorithm.

When the system upgrade is complete, each stop will have new flag-style signs installed with passenger information indicating the stop ID, phone number(s), the MYDTA app URL and other information to provide arrival information for the stop. (They are static signs, not digital.) It is the DTA’s intent to include information on texting capabilities for bus arrival information on the signs as well.

B. DTA Operations

1. The DTA operates 14 routes in Duluth, Hermantown and Proctor, MN, including two routes in Superior, WI. The DTA also has a summer trolley line that generally runs from Memorial Day to Labor Day. After a Comprehensive Operational Analysis, the DTA is implementing a network redesign to streamline routes and increase frequencies on our highest ridership corridors for more efficient operations. The changes will roll out second quarter of 2023.
2. There are approximately 800 bus stops in the DTA system; peak service requires 43 buses. Service is from 5:00 a.m. until midnight weekdays, 6:00 a.m. to midnight on Saturday and Sundays.
3. Each bus stop has a unique identification number such as 2-1468. The DTA is interested in learning if there is an option available to include alpha characters in the bus stop ID, or it is only available with numeric characters.
4. The DTA prefers a five-digit number for riders to request a text message on next bus information.
5. The GTFS feed is very reliable, but the MYDTA app and the Transit App revert to the static feed in the rare event the GTFS feed is unavailable. The Contractors shall make provisions for the static feed as an alternate when the GTFS feed is not available.

6. The DTA currently publishes service alerts and rider alerts through our GTFS feed, but is open to proposals that include a mechanism to provide service and rider alerts. If the Respondent elects to Propose this option, the Proposal must detail the option separately and provide an itemized price for it.

7. The DTA's Automated Vehicle Locator system ("AVL") has GPS tracking via radio signal and is polled every 30 seconds. Every DTA bus also has a Sierra Technology MG 90 modem that polls every 10 seconds. In addition, every bus has a mobile ticketing reader, ("JRV") from Masabi, Inc., a FastFare farebox manufactured by Genfare, the Transit Priority System ("TSP") manufactured by Opticom that all have GPS tracking; and model years 2018 and 2020 heavy duty buses use a telematics system from ViriCiti that includes GPS tracking.

8. The DTA does not require people to enroll or log into a site to receive the next bus information. If a Respondent has the ability for customers to opt in for periodic messages, please provide details in the proposal along with itemized cost for the service. The customer will be responsible to pay any SMS fees that may be applied.

C. Scope

1. The selected Contractor will provide a turnkey system ("System") to integrate the DTA's existing AVL and GTFS-RT information with the text messaging. The System data, with predictions, must be made available in GTFS-real time format that is synced with the DTA's GTFS data. The GTFS-RT feed is available on the DTA website at <https://www.duluthtransit.com/home/doing-business/developer-resources/>. Real time data should also be available in a human readable format such as JavaScript Object Notification (JSON).

2. The System will be hosted by the Contractor; no system software or servers will be maintained by the DTA.

3. The Subscription period for the SMS service will be for a period of three years, with three options of three years each. Respondents will provide a Cost Proposal with itemized costs for the first Contract period through December 31, 2025 and a percent increase in itemized costs for the option period of January 1, 2026 through December 31, 2028. Costs for the option period of January 1, 2029 through December 31, 2031 shall be negotiated at the time the DTA exercises the renewal.

4. The selected Contractor will also provide reporting tools to the DTA for analysis and evaluation of data on the number of requests by bus stop ID.

5. The DTA will not accept technologies that do not integrate via a software development kit ("SDK") or an automated programming interface ("API"), are not scalable, and/or require additional hardware on vehicles.

6. The System will accept the DTA GTFS data automatically and will combine multiple vehicle position feeds in real time for maximum accuracy. Changes to the DTA data will be updated at least daily. The DTA makes changes to the system in real time for detours and other irregular operations. Minor adjustments to the routes are also made periodically to refine the timing of stops for improved efficiency or on time performance for the riders. These adjustments typically are done about four times a year and the changes are pushed through the GTFS feed.

The DTA may, at its option, request a demonstration of the accuracy of the predicted arrival time data of the Proposed System.

7. The System will include storage of select DTA AVL data and processing on the stop ID, date and time of the text request and any other information that the selected Vendor may have that will help the DTA identify recurring issues or provide additional support services for riders, and will accept the data even when there is insufficient information, such as route assignment, for tracking and reporting. The metrics can be made available in an Excel spreadsheet upon request from the DTA, and data retention is preferably for a period of two years after the text request. Respondents should provide a summary of what data metrics they have available, and whether the metrics can be customized for future DTA needs.

D. Proposal Submission Requirements

1. The Respondent shall provide the DTA with a summary of the proposed System, including, but not limited to:

- A list of features and capabilities provided for the customer
- Examples of the SMS text
- A detailed list of any equipment to be purchased by the DTA to support the System, including model, cost, warranty information and costs for any extended warranties available
- A detailed summary of the equipment and technical provisions of the System that will be installed at the DTA or on DTA vehicles
- An explanation of the accuracy of the predictive arrival time
- A list of all feeds it can accept and export
- A summary of the accuracy of the real time arrival predictions
- A summary of the reporting capabilities of the System, including any ad hoc reporting
- Details on how the SMS are accessed by the customer and DTA administrative staff
- An overview of the recovery process in the event of a System outage

2. The Respondent will also provide the following information in its submittal:

- Detail the number of users allowed, permissions and abilities within the software that are programmable by the DTA
- A description of how software updates are conducted, and the planned number of updates for the first and second year of the Subscription period.
- A description of the timeline, and strategy for project completion, testing and acceptance.
- A description of initial training offered by the Contractor, as well as ongoing support.
- A summary of reliability of the System, including uptime, troubleshooting, verification of the accuracy of the data, escalation of customer service issues and other ongoing support offered by the Contractor to support the System for the duration of the Contract.

3. In addition to the Technical capabilities of the System, the Respondent will submit a brief overview of the Company, past experience and three references of other transit systems using the system.

4. Should the Respondent have any exceptions to the RFP or additional provisions they would like the DTA to consider, they should first seek clarification through the question and answer process. Any exceptions or additional provisions still remaining at the time of submission must be submitted with the Proposal and cross referenced with the RFP, including the Proposer's rationale for making them.

The DTA reserves the right to reject any and all vendor-proposed exceptions or additional provisions to the RFP without comment.

E. Cost Proposal

The Respondent will provide a detailed Cost Proposal that includes one-time start up fees, itemized costs for licensing and other ongoing costs to host and maintain the System, equipment warranty costs, costs for periodic upgrades if not included in the license, and all other costs applicable to the DTA for a fully operational system for the first three years of the Contract, and the percent increase in costs for the first three-year option period.

F. Evaluation

1. All responsive and responsible responses to this RFP will be reviewed for completeness prior to being referred to the Evaluation Committee. A Committee consisting of DTA representatives and/or other will then evaluate the responses for technical qualifications and consistency with specifications.

2. Evaluation Criteria

A. Technical capability of the Proposed System	35%
B. Quality of the Products and Services offered	30%
C. Qualifications and experience of the Proposed team	20%
D. On-going support, reliability of the Proposed System	10%
E. References, other relevant matters	5%

A. The Committee will evaluate the Proposed System against the DTA's expectations for the System, including the technical details, compatibility with the DTA's customer service objectives, ease of use.

B. The Committee will evaluate the quality of the Proposed products and services offered, including reliability, independent equipment ratings, warranty, and other quality related items.

C. The Committee will evaluate the quality of the Proposed team, including past experience with implementing a similar System in other transit agencies, and ability of the team to meet the deadlines for the project.

D. The Committee will evaluate the ongoing support for the Proposed System, including training, the implementation plan, availability of updates, reliability of the System, and recovery time in the event of a System failure.

E. The Committee will evaluate the references of the Offeror, and other relevant matters such as past performance with the DTA, use of subcontractors, the apparent general understanding of the work to be performed and other matters deemed relevant to the Committee.

3. Cost. The Committee will evaluate the reasonableness of the Cost Proposal, including ongoing costs. As Proposals are considered by the DTA Evaluation Committee to be more equal in their technical merit, the evaluated cost or price becomes more important so that when technical Proposals are evaluated as essentially equal, cost or price may be the

deciding factor.

4. The Committee may interview Offerors, and/or Offerors may be asked to provide a demonstration of their Proposed product at the sole discretion of the Evaluation Committee.
5. The Committee may elect to award a Contract without conducting interviews or a demonstration, at its sole discretion.
